

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

How to get to Pitcairn Islands?

Totegegie Airport in Mangareva can be reached by air from the French Polynesian capital Papeete. There is one 6.4-kilometre (4 mi) paved road leading up from Bounty Bay through Adamstown. The main modes of transport on Pitcairn Islands are by four-wheel drive quad bikes and on foot.

Are there Adventist churches in Pitcairn?

Archived from the original on 19 October 2015. Although the Adventist Church has always maintained a resident minister and nurse on Pitcairn, there have been fewer adherents and some church members have moved away from the island. By the end of 2000, regular church attendees among the island population of 40 numbered only eight.

Is it dangerous to sail from Pitcairn to Mangareva?

It was organized by medical authorities in the United Kingdom and New Zealand, and French authorities in Mangareva and Papeete. The British High Commissioner to New Zealand said "It can be a hazardous sea voyage from Pitcairn to Mangareva. This is especially so for open long boats.

How did the Pitcairn Islands make money?

The Pitcairn Islands issued their first stamp in 1940. These became very popular with stamp collectors, and their sale became the dominant source of revenue for the community. Profits went into a general fund which enabled the island to be mostly self-sufficient.
