energy market as an independent Power producer (IPP) to generate and sell electricity in Southern Africa. Our main product is electricity supply to the regional market.

The Renewable Energy Strategy and Investment Plan (RE-SIP) lays out the Solomon Island's renewable energy targets and policy outcome and strategies and financial requirements for achieving a sustainable energy future for all Solomon Islanders.

Known as PIGGAREP (The Pacific Islands Greenhouse Gas Abatement through Renewable Energy Project), this project aims at helping 11 Pacific islands overcome their barriers to using effective renewable energy ...

Accelerating Clean Energy Access in Solomon Islands (ACEA-SI) is an Australian Government funded program in Solomon Islands, designed by Archipelago Energy (AE), that is developing a method to address the barriers to clean energy investment in Solomon Islands through the development of real-world projects.

The Solomon Islands are a Western Tropical Pacific archipelago of 21# major islands and almost 1,000 smaller islands scattered across 1500 km, located to the northeast of Australia and east of PNG. As a result of having to rely on expensive, imported diesel for power generation, electricity on the Solomon Islands is some of the most expensive ...

It is expected that more than 9,300 Solomon Islanders will benefit from new or improved electricity services, including renewable energy sources. The ADB Electricity Access and Renewable Energy Expansion Project will deliver renewable energy hybrid mini-grids, electricity connections in low-income areas, and new grid-connected solar power.

Known as PIGGAREP (The Pacific Islands Greenhouse Gas Abatement through Renewable Energy Project), this project aims at helping 11 Pacific islands overcome their barriers to using effective renewable energy technologies, including the Solomon Islands.
