Energy Vault Holdings, Inc. (NYSE: NRGV) ("Energy Vault") is a leading provider of ultra long duration energy storage solutions. The company's proprietary Gravity Energy Storage System (GESS) is a 4-hour duration project being built outside of Shanghai in Rudong, Jiangsu Province, China. The EVx (TM) is under construction directly adjacent to a wind farm and national grid. It will augment and balance China's energy grid through the shifting of renewable energy to serve the State Grid Corporation of China (SGCC) and its subsidiaries, including China Tianying Inc. (CNTY) (CN: 000035).

Energy Vault Holdings Inc. (NYSE: NRGV) ("Energy Vault" or the "Company"), a leader in sustainable, grid-scale energy storage solutions, is honored to announce the selection of its EVx...

The G-VAULT(TM) platform utilizes a mechanical process of lifting and lowering composite blocks or water to store and dispatch electrical energy. The result is a series of flexible, low-cost, 35-year (or more) infrastructure assets designed for large scale shifting of power delivery without any energy storage medium degradation.
