

Can Guinea Bissau use solar energy?

Table 1: Solar insulation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m²/day (table 1),GB should be able to take advantage of all solar energy applications.

Who manages the electricity sector in Guinea Bissau?

The National Electricity and Water Corporation (EAGB) manages the electricity sector in Guinea Bissau. On a regional level, the country is a member of the West African Power Pool. The main sector policy is the National Energy Policy 1995, and more recently, the Energy Master Plan of 2013.

How much electricity does Guinea Bissau use?

Guinea Bissau has a population of 1.75 million (Table 1). Total production of electricity in 2015 was 13 ktoe with all of it produced from fossil fuels (Table 2). Final consumption of electricity in the same year was 6 ktoe (AFREC, 2015). Key consumption and production statistics are shown in Figures 2 and 3.

What is the most popular solar application in Guinea Bissau?

As of today, the most popular solar application is the rural individual photovoltaic system that has been exploited in Guinea Bissau for the producing electricity to power houses, schools, offices and hospitals or health centers. Solar water pumping is the second most installed solar application in GB (Ex. PRS I and II in Table 2).

What is wind energy used for in Guinea Bissau?

Wind energy is extracted from wind speeds by wind turbines. It was first used to produce mechanical power (windmills). Nowadays, it is mainly used for the production of electrical power. Unfortunately, none were counted in Guinea Bissau.

What techniques are used to produce electricity in Guinea Bissau?

The main techniques used for the production of electricity are dams but there are also other techniques such as: Run-of-the-river hydroelectric, pumped-storage hydroelectricity, Tidal power and wave power¹. Guinea Bissau has an important site for the construction of a dam with a good potential for power generation.

In addition, Guinea-Bissau is eligible for technical assistance and a line of credit to develop its market of off-grid solar home systems pursuant to the Regional Off-Grid Electricity Access Project (ROGEAP, P160708).

World Bank funds Guinea-Bissau's first solar power plants for decarbonisation and expanded electricity access. The World Bank, IDA, ESMAP, and GCF committed \$78.15 million to support solar energy development. The project includes multiple solar plants near Bissau and mini-grids on Bijag's islands and aims to benefit 1,200 households and SMEs.

Learn about the World Bank's \$35 million grant to Guinea-Bissau for a solar energy project aimed at enhancing electricity access and sustainability through solar power generation and infrastructure development.

Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist Guinea-Bissau until 2030 and has already approved a USD \$30 million grant. Additionally, the International Development Association (IDA), a World Bank subsidiary, will contribute \$35 million, and the Energy Sector Management Assistance Program ...

The Ministry of Energy and Industry is in charge of both implementing policies in the energy sector and regulating them (Table 5). The National Electricity and Water Corporation (EAGB) manages the electricity sector in Guinea Bissau. On a regional level, the country is a member of the West African Power Pool. The main sector
