

Guinea-Bissau solar panel system on installment

Guinea-Bissau. Case study: Solar Home Systems for rural development of Guinea-Bissau . Publication date: 2022. Author: ALER. Description: This project works according to a pioneering Energy-as-a-Service model that has several advantages, such as the low initial investment cost and customers not having to pay for equipment management and ...

The massive solar and storage project in Guinea-Bissau is set to revolutionize the country's energy sector. With over 200 hectares of land dedicated to solar panels, the project will provide electricity to over 250,000 people in Guinea-Bissau.

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijag's islands, thereby providing electricity to 1,200 households and SMEs.

In addition, Guinea-Bissau is eligible for technical assistance and a line of credit to develop its market of off-grid solar home systems pursuant to the Regional Off-Grid Electricity Access Project (ROGEAP, P160708).

Forty-three young people from six municipalities in the Sahel region completed a ten-day training course in Dori on Wednesday, September 18, 2024, in photovoltaic solar system installation and maintenance techniques.

International finance institution the World Bank will support the development of Guinea-Bissau's first solar power plants with a \$35 million grant through its Solar Energy Scale-up and Access project.
