

Conakry, Republic of Guinea: InfraCo Africa, part of the Private Infrastructure Development Group (PIDG) and Solveo Energie, have signed a 25-year Power Purchase Agreement (PPA) with Electricité de Guinée (EDG); marking a significant milestone for ...

"Khoumaguéli Solar is an exciting project for InfraCo Africa and our partners as it adopts an innovative approach to the development of Guinea's renewable energy sector; using solar to enhance the viability of the country's existing hydro ...

The state utility's first grid-tied solar project is designed to complement EDG's nearby 75MW Garafiri hydroelectric power plant, helping to offset the impact of fluctuating rainfall on hydropower generation.

Khoumaguéli will be Guinea's first grid-connected solar power plant, adding 40MWp of much-needed, renewable energy to the country's 566 MW national grid. Located near the city of Linsan in the Province of Kindia, the plant will connect to existing grid infrastructure.

As one of Guinea's earliest renewable IPP initiatives, the Khoumaguéli project has used grant funding from PIDG's Technical Assistance (TA) to support work to build government capacity to undertake future renewable energy projects with the private sector.

With GuineaSolar you will rapidly reap the benefits of Solar Power. No matter the layout of the site, our team of skilled experts know how to successfully deploy projects across Africa in remote locations or busy cities.

The PPA milestone was announced on Wednesday by InfraCo Africa, which is developing the project with the support of Aldwych Africa Developments Ltd, in partnership with French solar developer Solveo Energie SAS. It comes after a concession agreement was signed in February 2019.
