

What is home power solutions?

Home Power Solutions has the clear goal of revolutionising the world's largest sector consuming fossil energy- building energy - which accounts for 40%. With our products,we're pioneering solar hydrogen,an energy source that's not only CO2-free,but also makes independence and security of supply possible for every home.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency,DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world,with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency,DR Congo only had 20 MW of installed PV capacity at the end of 2020.
