

Home solar power generation is not worth it

Do solar panels save money?

Solar panels generate electricity that you can use in your home, which reduces the amount of electricity you have to buy from the grid. This cuts your electricity bills, and if you get a solar battery too, you can save even more - 103%, on average, which means across a year you actually earn more than you spend.

Are solar panels worth it?

Solar panels are expensive, so they can sometimes not be worth the initial outlay if you're planning to move home within the decade. Also, while living with green energy is definitely a good thing to do in terms of the environment, solar panels might not be to everyone's tastes on top of their homes.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Do solar panels add value to a house?

Solar panels can add around \$15,000 of value to your home and help your house sell quicker than houses without solar, according to the US Department of Energy's Lawrence Berkeley National Laboratory. Solar panels can add to your home's value. Solar panel cost and efficiency has improved greatly over the last 10 years.

Should you consider solar panels as a home improvement?

It's also worth considering solar panels' value as a home improvement. Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.
