

Hoppecke battery Lesotho

Is Hoppecke a good battery?

HOPPECKE offers energy storage solutions as lead-acid- or nickel-cadmium industrial battery systems in almost any application where critical backup DC energy is needed. Having ISO 9001, 14001, IEC, DIN, TUV, DNVGL and many other international standards and certifications, Hoppecke is one of the highest quality batteries on the market today.

Who makes Hoppecke batteries?

Railway and metro systems propulsion and safeguarding (rail). With headquarters in Brilon-Hoppecke, with 22 international subsidiaries, more than 2,000 employees worldwide belong to the HOPPECKE family. Today, HOPPECKE is Europe's largest privately owned manufacturer of industrial batteries.

Are Hoppecke lithium-ion modules CE certified?

lity controls. Moreover, HOPPECKE lithium-ion modules are also UN38.3 ("Transport of lithium batteries") an CE certified. Working closely with various certification bodies and test laboratories allows us to achieve application-specific system certific

What does Hoppecke stand for?

HOPPECKE stands for first-class quality throughout the world. The high standard of quality of our systems ranges from battery to charger, control units, monitoring and filling installations.

What is a Hoppecke energy system?

Full-Service models and technical system management. Energy systems consist of perfectly coordinated energy storage devices and added-value generating components. The core element, which is typical for an energy system, is the project and engineering service of HOPPECKE, which makes a system both customer-oriented and of higher quality.

What are anhanwendungenhoppecke lithium-ion battery systems?

anhanwendungen HOPPECKE lithium-ion battery systems have a modular structure and are comprised of 24 V or 133 V basic modules. These basic units are designed in such a way that they can be used as individual blocks or installed as a group consisting of several modules to form a larger

HOPPECKE Batteries is the largest producer of industry battery systems in European ownership. Since 1927, the family company has been developing and producing in Germany, and thanks to its leading research and development activities, it has all reliable and innovative storage technologies in its product portfolio.

HOPPECKE offers energy storage solutions as lead-acid- or nickel-cadmium industrial battery systems in almost any application where critical backup DC energy is needed. Having ISO 9001, 14001, IEC, DIN, TUV, DNVGL and many other international standards and certifications, Hoppecke is one of the highest quality

Hoppecke battery Lesotho

batteries on the market today.

The lithium-ion battery system offers a high degree of flexibility through the use of high-power and high-energy modules. Tailored to your requirements, an optimal ratio between fast charging capability and range is thus realised.

HOPPECKE provides: Lead-acid batteries widely used in the railway sector. Proven and still unique FNC technology. The highest technological standard in the alkaline range, the nickel metal hydride technology (NiMH). For trend-setting developments in the railway sector, HOPPECKE keeps ready innovative developments of Li-Ion battery systems.

Manufacturer of wet nickel cadmium batteries. Available with 10 A to 1,100 A hour capacity and -40 degrees C to +60 degrees C operating temperature. Various features include flame arrestor safety vent, low pressure vent with internal gas recombination and transparent flame retardant plastic containers.
