

# Household solar bracket price

How much does a solar panel cost in the UK?

The average cost of a solar panel in the UK based on a 350-watt panel is currently between £500 and £800. However, please bear in mind that this is the price for a single solar panel and does not include the professional installation or any other extras e.g. pigeon proofing. With that said, let's explore some common solar installation scenarios...

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500, whereas polycrystalline solar panels cost about £900 per kW.

What is a solar panel cost calculator?

The solar panel cost calculator below will help you determine how much energy you can save, as well as the financial rewards you could potentially earn by installing a solar panel array on your property. Please bear in mind that the calculator will provide estimates based on the information you have provided.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000, including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar & battery system, as there's currently 0% VAT on both panels and batteries.

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. \*kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.
