

How about selling photovoltaic panels through live streaming

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government has backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How do solar panels work?

How it works is quite straightforward. As long as you are signed up for the scheme, and your solar panels are connected to the national supply, you can choose to either store or sell your excess solar energy. Once the energy is sent to the grid, the energy supplier will pay a set tariff rate per unit.

Do solar panels save money?

Selling electricity back to the grid is by no means the only benefit of solar panels. According to the Energy Saving Trust, solar panels were cutting home energy bills by up to 70% in 2023. How much money you'll save depends on the size of your solar system and how much electricity you use.
