

# How much does a 10kw solar power system cost

How much does a 10kW Solar System cost in the UK?

In 2024, the average 10kW solar system cost in the UK is between £10,000 - £11,000. This price includes the supply of the 10kW solar panel equipment, installing and connecting to the electricity supply, and VAT (zero-rated). If you'd like to store a portion of the electricity you generate, you'll have to take the solar battery price into account.

How much does a solar system cost in the UK?

The average solar system cost has risen in recent years as inflation has affected the cost of materials and labour. Despite the price increase, 60% more homeowners in the UK installed solar panels in 2023 than in 2017. In 2024, the average cost of a 10kW solar system in the UK was between £10,000 and £11,000.

Is a 10kW solar panel system right for You?

A 10kW solar panel system is a rather large system, so there's a lot to consider, such as cost, space, environmental footprint, maintenance, solar panel efficiency, and more. Many homeowners across the UK agree the advantages outweigh any disadvantages - as seen in the increasing number of new solar panel installations every year.

Is a 10 kW solar system too expensive?

Although this expense can be financed or recouped via energy bill savings (which we'll get into more later on), 10 kW of solar may still be too expensive for some homeowners. Just remember that a 6kW system or even a 3kW system can still help most Americans reduce their long-term energy expenses. **MORE:** How much do solar panels cost?

Are 10kW solar panels too big?

1. A 10kW solar panel system in the UK can be too large for domestic use. Depending on how much electricity your household uses on a daily and annual basis, solar panels in a 10kW system may be too large.

What is a 10kW solar energy system?

A 10kW solar energy system can provide all the electricity the average home needs and probably more. In other words: The excess energy produced by your solar panels can be sent back to the grid, allowing you to make money from it. If you're connected to the power grid, a 10kW solar panel array can functionally offset all of your utility energy use.
