How much does a solar panel cost in the UK?

The average cost of a solar panel in the UK based on a 350-watt panel is currently between £500 and £800. However, please bear in mind that this is the price for a single solar panel and does not include the professional installation or any other extras e.g. pigeon proofing. With that said, let's explore some common solar installation scenarios...

How much energy does a solar PV system generate a year?

Solar panel systems on homes are typically up to 4kWp. A system of this size can generate more than 3,000kWh per year. For comparison, a home using a 'medium' amount of electricity gets through 2,700kWh a year on average, according to energy regulator Ofgem. A 'high' user takes 4,100kWh a year. The cost of a solar PV system depends on:

Do solar panels have battery storage?

Battery storage lets you bank electricity generated by your solar panels until you need it. But batteries are expensive so it will take longer for your system to pay for itself. Find out more about solar panels and battery storage. The cost of a battery is not included in the prices above.

How much does it cost to clean solar panels?

However, if you notice your solar panels becoming dirty - for example, bird droppings, or dust building up on them during a dry, hot summer - you should consider getting them cleaned. Solar panel cleaning by a professional will cost around £100, but you can do it yourself with a hose. How much do solar batteries cost?
