

# How to fix the photovoltaic panel to the roof

Can solar panels be mechanically fixed to a flat roof?

When you specify a photovoltaic array for your flat roof, there is the option of either mechanically fixing the array, or alternatively using ballast to weigh it down without fixing into the structure. In this article we will look at the options for mechanically fixing solar panels to a flat roof and make the case for an engineered solution.

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

Can you make a whole roof out of solar panels?

It is possible to create a whole roof out of solar panels using an in-roof system. Making the whole roof out of solar panels can be a fantastic option as installing solar panels is an asset to the home because of the savings in electricity and feed-in tariff payments. Why not consider making it your total roof covering?

Can solar panels be installed on a tiled roof?

Installing solar panels on roofs is a popular choice for several reasons: low chances of shade from nearby objects, ample space that serves no other purpose, and closeness to your home. How are solar panels fixed to a tiled roof? Solar panels are mounted on a system of rails and roof hooks. The rails float above the roof tiles.

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

How to install solar panels on a roof?

Take into account the roof orientation of the panels and ensure that the mounting framework is slightly tilted, usually between 18 and 36 degrees. Some companies use solar trackers to improve the efficiency of energy conversion. Following the mounting setup, the solar panels are securely attached to the mounting structure.

If your roof needs repair work done underneath where the solar panel system has been installed then it will be necessary to remove them temporarily until after repairs have been completed. ...
