How do I choose a portable solar panel?

When choosing a portable solar panel, it's a good idea to look at its efficiency rating- the best panels are over 20% efficient. You should also note the warranty period - typically 10 years - which is a guarantee of how long your solar panel will operate at maximum efficiency. How efficient are portable solar panels?

Can you install solar panels on a flat?

Portable solar panels can be a great option for people who can't install mounted solar panels on their roof. If you live in a rented property or a flat, for example, it can be tricky to get permission to install a solar panel system. You can read more about the ins and outs of installing solar panels for flats in our handy guide.

Can a portable solar panel be used in a garden?

While commonly used for outdoor activities such as camping, they can also be set up in your garden. These panels are generally smaller than standard solar panels and typically have an output of around 100 to 200 watts (W) on average. To use portable solar panels effectively, they are often paired with a solar generator.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solaris is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.

Can solar panels be installed on the ground?

Here's another advantage of solar panels installed on the ground in a garden: you absolutely don't need to drill any framework onto the roof of your house or shed. Not only would this save you some precious time, but it could also save you a little money. Also, garden solars are typically a low-cost installation.
