Outlook for Renewable Energy Sources. The new decree aims to generate decentralized energy, reduce the burden on the state, and lower dependence on imported fuels. Since 2019, when the government issued Decree-Law No. 345 on "the development of renewable energy sources and efficient energy use," this policy has been a priority.

Cuba's transition to renewable energy generation would reduce greenhouse gas emissions, helping to mitigate climate change and reduce local air pollution, while also providing a more resilient source of power compared to the current fossil fuel-heavy power system.
