

How will EIT InnoEnergy and Siemens bolster Energy Transition projects in Spain?

These technologies are already in deployment in a range of business sectors - improving efficiency, proactivity and time-to-market, whilst reducing energy costs. EIT InnoEnergy, the leading innovation engine in sustainable energy, and Siemens have announced a new collaboration designed to bolster energy transition projects in Spain.

Which companies will contribute to Spain's energy transition?

Red Eléctrica de España, S.A. is another company that will contribute to Spain's energy transition. It plans to expand and reinforce its transmission network, which transports electricity from power plants to homes, businesses, and industries.

Will Spain become Europe's first green hydrogen net zero industrial park?

This collaboration aims to establish Europe's first integrated green hydrogen net zero industrial park, positioning Spain at the forefront of the continent's green energy transition. The ambitious project, backed by an initial \$1 billion investment, is poised to significantly accelerate Spain's green hydrogen adoption plans.

Will Siemens support energy transition projects in Spain?

We have announced a new collaboration with Siemens designed to bolster energy transition projects in Spain.

How will Envision accelerate Spain's green hydrogen adoption plans?

The ambitious project, backed by an initial \$1 billion investment, is poised to significantly accelerate Spain's green hydrogen adoption plans. By developing a state-of-the-art facility capable of producing high-capacity electrolyzers, Envision and its partners are targeting the delivery of five gigawatts of electrolysis capacity.

Who owns EIT InnoEnergy?

SFSA has been a shareholder of EIT InnoEnergy since the end of 2021, contributing its experience in financing large-scale industrial projects focused on sustainability. Now other divisions have joined the alliance such as Siemens Digital Industries - providing expertise on

The European Investment Bank (EIB) has signed a EUR120 million loan with Iberdrola to finance the development of research and innovation projects involving energy technologies, with the goal of backing and

...

In Spain, powerful incumbent actors have moved to block the clean energy transition. These dynamics also exist elsewhere, jeopardizing the goals of the Paris Agreement. To address this, policy makers must identify barriers and negotiate pathways with key actors.

With innovation at our core, we invest in the development of innovative and sustainable technologies, aligned

with the fundamental vectors of the transformation of the energy sector: decarbonisation through the adoption of renewable energies, the promotion of smart grids and the electrification of transport, buildings and industry.

In a landmark move set to reshape Spain's renewable energy landscape, Envision Energy has announced a major partnership with the Spanish government and industry leaders. This collaboration aims to establish Europe's first integrated green hydrogen net zero industrial park, positioning Spain at the forefront of the continent's green energy ...
