

Installing photovoltaic panels affects property owners

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

Do solar panels affect the conveyancing process?

With the rise in popularity of solar panels in recent years, many homes are now being sold with solar panel installations on the roof. While solar panels are very beneficial in reducing energy costs and providing a sustainable source of energy for your home, the presence of solar panels can have an impact on the Conveyancing process.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can a landlord install solar panels?

Solar panel installation is generally simpler if you own your home; however, if you're a leaseholder or in a shared-ownership property, you may be able to install solar PV with the permission of your freeholder or landlord. Solar panels can be installed on blocks of flats, but this is often done by the landlord or freeholder.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.
