

# Is it okay to buy photovoltaic panels by yourself How to buy them

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solar is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

How much does a solar PV system cost?

The average cost of a typical 3.5kW solar PV system is currently around £6,000, roughly 10% of which pays for professional installation. To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself.

Should you invest in solar panels in the UK?

To make solar panels more affordable for everyone in the UK, the government has set up incentives like solar panel grants. Even so, investing in solar panels can still be a considerable investment which some are not prepared to make. So what else is there to do? Build it yourself of course.
