Laos bestech bms

I am trying to choose a battery management systems (BMS) from BesTech Power. These are rated, in part, according to amperage. Ida Li, BesTech sales rep, says I should determine the "maximum continuous amperage" of my system.

this is a D131 24S lipo BMS with the signal lines opened above the 20S level to prevent false HVC and LVC signals from the "ghost" cells above. i was able to restore this BMS to 24S by resoldering the resistor on the LVC line and resoldering that resistor on the HVC line on top back onto the pads to reconnect the signal line to the bottom of 21S.

for the 24s there is one 9pin connector and 2x 8pins. making 25 wires (those come with the bms). yesterday when installing it i thought a long time how to connect everything. i already had 4x 6s jst-xh connectors installed. good to connect celllogs for monitoring them or for balance charging with my bc168. i thought of removing those and to ...

The time of a batteries failure is not the time when we"d want to find out if that cheap BMS, was working or not. So, use a quality BMS to protect your battery investment, and your battery will reward you with thousands of recharge ...

Protection Circuit Board for Li-ion and Li-Polymer battery packs Integrated E-switch Protects the battery pack from overcharge, overdischarge, over-current, over temperature and short circuit. ...

I was looking in to their 200A 12V battery pack, which looks to be a basic 3.2V Prismatic thrown together and apparently comes with this BMS. Anybody using this BMS here or even the whole battery product or do you wise people see any red flags on this?

Programmable BMS with SMBUS, UART, RS485, CANBus Communication protocol HCX-D328 BMS main functions descriptions: 1 tegrated with Microchip, designed for Li-ion / Li-Po (3.6V/3.7V) and LiFepO4 (3.2V), configured from 6S till 20S,accurate SOC/SOH by detecting voltage and current, able to detect the voltage of signal cell.

Protection Circuit Board for Li-ion and Li-Polymer battery packs Integrated E-switch Protects the battery pack from overcharge, overdischarge, over-current, over temperature and short circuit. Cell balancing Please note: always turn on the bms while charging Datasheets 10s40A10s60A10s80A12s80A

The Bestech BMS" have various models for wide variety of uses. I am at present revisiting the HS-015 but there are others worthy of consideration. Please Note that these are not "discount value BMS", they are more in line with TinyBMS and higher level systems.
