

Latest standards for photovoltaic panel metering rules

What does the new solar PV standard mean for solar PV installers?

The timely new Standard comes as strong signs of recovery can be seen after a turbulent 18-months for Solar PV installers. The publication coincides with MCS reporting encouraging volumes of Solar PV installations despite the government closing the Feed in Tariff (FiT) incentive in March 2019.

Are there building regulations for solar panels?

There are building regulations for solar panels, as there are for most home improvements. These government regulations are frequently updated to ensure that any alterations made to properties don't threaten the safety or health of people who live or work in them.

Do solar panels need planning permission?

Before this latest announcement, any solar panels generating more than one megawatt of energy would need planning permission. The government hopes this relaxation will help it meet the commitment to producing 70MW of solar power by 2035. How do solar panels work with your electricity bill?

What does the MCS update mean for solar PV contractors?

The update outlines the installation requirements for MCS certified contractors who supply, design, and install solar photovoltaic (PV) systems. It also adopts the IET Code of Practice for solar photovoltaic systems and withdraws the MCS PV Guide.

What is considered a stand-alone solar PV installation?

Installations with a TIC of 250kW or less. A solar PV installation with a TIC of 250kW or less will be classified as stand-alone if it is not wired to provide electricity to a building. If it is wired to provide electricity to a building,

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

The complex process of revising the rules elicited tens of thousands of public comments and was, at one point, arbitrated by Gov. Gavin Newsom. "California needs more solar power -- not less. Just as more ...
