

What is the largest solar park in Latvia?

This will be European Energy's first project in Latvia and the largest solar park in Latvia. The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.

Does Latvia have solar energy?

So far, however, the development of solar energy in the country has been rather limited. According to Latvia's grid-operator Sadales tīkls AS, which is a subsidiary of Latvenergo, there was just 1.3 MW of renewable energy power installed under net metering at the end of 2016.

Will there be a solar panel Park in Latvia?

Work has already begun on the assembly of the panel structure to prepare for the laying of the panels," Berzins said. Merito, which is the owner of Kalkunes SES, will have eight such solar panel parks in Latvia, said Maris Plūme, board member of the fund's cooperation partner, the company "Saules Energy" (Solar Energy).

What is European energy doing in Latvia?

European Energy started developing renewable energy projects in Latvia in 2021, and with the opening of its office in Riga, four employees have joined the company in Latvia to develop a strong pipeline of renewable energy projects in the country.

What is the Stability Programme of Latvia?

The Stability Programme of Latvia is a medium-term policy document, describing Latvian fiscal policy and which has been prepared following the conditions and guidelines of the Stability and Growth Pact. The Stability Programme is focused on implementation of strict and sustainable fiscal policy and on the provision of macroeconomic stability.

How much electricity will the Daugavpils solar power plant produce?

Annually, the solar power plant will produce 13,500 megawatt-hours of electricity, which will be enough to fully supply at least 6,500 households in the Daugavpils area. "We are located in Kalkune parish, we will start work here, we will build a solar panel park.

The solar farm will have a capacity of 148 MW once completed, which will make it one of the largest solar farms in the country. The solar farm will be located near Targale in Ventspils County. Upon completion, it will be able to produce around 154,550 MWh annually, providing electricity equivalent to the household consumption of approximately ...
