What is the status of Exide Technologies?

The Exide Technologies lead-acid battery recycling plant in Vernon, California, which sits on a 15-acre site, remains half-demolished and partially covered in white plastic sheeting, scaffolding, and a negative pressure system designed to prevent the release of lead, arsenic, and other hazardous pollutants. The facility's fading exterior is a testament to its current state.

Which battery chargers does Exide offer?

Exide launches specific chargers for its Marine & Leisure Equipment Li-Ion battery range. You have a plan. We have the energy. Solition Mega - Battery Energy Storage Systems (BESS) is based on Li-Ion battery technology.

Who is Exide Technologies?

Exide Technologies, LLC | 41,906 followers on LinkedIn. Exide Technologies, LLC, as a part of Exide Holdings, Inc., filed a voluntary petition for relief under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware on May 19, 2020.

Why did Exide Technologies shut down its plant?

Exide Technologies' plant in Vernon, California, operated with only a temporary permit for more than three decades despite repeated violations of air pollution limits and hazardous waste rules. The plant shut down permanently in 2015 under a deal between the company and the U.S. Attorney's Office for the Central District of California.
