

# Looking for land for rent under photovoltaic panels

Can I rent land for a solar farm?

Renting land for a solar farm is a commercial lease and is not an agricultural use, so Agricultural Property Relief from inheritance tax may be lost. Transferring ownership of the land to another individual or trading entity before any development starts may be worth considering, to minimise the tax implications, but seek professional advice.

How much land do you need for a solar panel farm?

The first thing you'll need when setting up a solar energy project is somewhere for it to go. And when you're looking for land, know that solar panel farms need quite a lot of it (compared to other forms of power generation) - for a 1MW farm, you'll likely need 5 - 8 acres. Keep in mind that you won't just need space for the panels themselves.

How much does a solar farm land lease cost?

With solar farm land lease rents ranging from £850-£1100 (depending on variables such as development size and location) per acre per annum, rental rates compare favourably with other income streams such as agricultural and livestock farming, event hosting and storage services.

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

Can solar farms be built on flat land?

As with most wind power projects, developers only place solar farms on land that meets certain conditions. The land should be sturdy for solar projects and not fall foul to sinking from soft soil. But it's also essential to consider the landscape for a site, as solar projects are particularly reliant on flat land without steep slopes.

Should you lease land for solar?

One of the biggest pros of leasing land for solar is the financial stability offered through these long-term annual payments. This can be especially beneficial for landowners looking for a way to supplement their farm or retirement income.

With solar farm land lease rents ranging from £850-£1100 (depending on variables such as development size and location) per acre per annum, rental rates compare favourably with other income streams such as agricultural and ...
