

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included.

Targets Renewable Energy Energy Efficiency Transportation In Place Proposed Prepared by the National Renewable Energy Laboratory (NREL), a national laboratory of the U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy; NREL is operated by the Alliance for Sustainable Energy, LLC.

Martinique could benefit by diversifying its energy portfolio to include more nuclear, wind, and solar energy. Investing in these technologies, as proven by other nations, can significantly ...

In a common research program, the Martinique energy agency and CEA decided to assess the variability of solar resource and PV power in Martinique Island and in the Provence region,...

In Martinique, Albioma has built, commissioned and is now operating the Galion combustion turbine and the first all-biomass thermal power plant in Overseas France. Against the backdrop of the energy transition, this new facility, Galion ...

Martinique has a high solar potential and set a renewable energy mix target of 100% by 2030. Presently Martinique energy mix is comprised of 25% renewable energy on the public grid. Its electrical demand peaks at 235MW and its electricity prices are very high relative to ...

In Martinique, Albioma has built, commissioned and is now operating the Galion combustion turbine and the first all-biomass thermal power plant in Overseas France. Against the backdrop of the energy transition, this new facility, Galion 2, covers approximately 18% of the island's power needs, while also enabling the share of intermittent ...

Martinique could benefit by diversifying its energy portfolio to include more nuclear, wind, and solar energy. Investing in these technologies, as proven by other nations, can significantly reduce dependence on fossil fuels and enhance the island's energy security.

The Galion solar power plant is located in Trinité, to the north of Martinique, on the roof of the island's only sugar refinery. It is located in the immediate vicinity of Galion 2, the 100% biomass power plant operated by Albioma since 2018, and has an installed capacity of 420 KWp.
