

Micro photovoltaic glue board installation method

Can I install a photovoltaic system less than 500m from the coast?

Any installed PV system less than 500m from coastline, please refer to the Near-coast installation manual. This guide contains information regarding the installation and safe handling of Wuxi Suntech Power Co., Ltd photovoltaic module (hereinafter referred to as "module"). Wuxi Suntech Power Co., Ltd referred to as "Suntech".

Can a photovoltaic module be installed outside?

Photovoltaic modules are designed for outdoor use. Modules may be mounted on ground, rooftops, vehicles or boats. Proper design of support structures is the responsibility of the system designers or installers. Mounting holes or clamp range and numbers suggested in this manual shall be used.

How to install PV modules in hot and humid environment?

PV modules install under hot and humid weather condition. PV modules installation site is under long-term humid environment such as water floating application. To reduce the risk of PID, on the modules DC connection site, it is recommended to connect the negative to ground.

What happens if a PV module is shaded?

If a module is shaded or even partially shaded, it will fail to perform at ideal conditions and result in lower power output. A permanent and/or regular shade on the module voids the warranty. This installation manual is applicable for all PV system of 500 m or more away from the coastline.

Do Suntech PV modules need a fuse?

Based on the maximum series fuse rating of module and local electrical installation code, always make sure Suntech PV modules are assembled with the appropriate string fuse for circuit protection.

Which method should a PV installer use?

Meet the requirements of the building regulations. Generally those involved with PV installation work will want to use method 2 or employ contractors who use method 1 as method 1 can be expensive and time consuming. When registering with a competent person's scheme, an installer
