

Moldova Solar este amprenta inovatiei si a standardelor nalte nca din 2014 cnd a fost creata prima companie din grup, ca o afacere de familie, iar de atunci compania a crescut exponential, devenind un grup de 4 companii cu linii de productie diferite.

In the south of Moldova, in Talmaza village, Stefan Voda district, an impressive photovoltaic park is rapidly growing, which will provide green electricity based on solar panels. The project is carried out by "Ostia Group" SRL, and its commissioning is planned for March 2023.

Moldova plans to hold tenders for 165 MW of large-scale renewable energy projects in April in an effort to support the Eastern European country's 2030 climate targets and cut its reliance on energy imports.

According to the Ministry of Moldova in the whole country there are currently 52 PV-power plants of different sizes with a total capacity of 2.93 MW, which means this new solar park in Bacioi village makes a significant contribution to the increasing green energy supply.

Moldova has proposed an ambitious strategy to increase energy production from renewable sources. The state will provide potential investors with tools and facilities to attract them to invest in green energy production in Moldova's growing market.
