

Should guidance on solar PV be included in the National Policy Statement?

The solar industry very much welcomes the addition of guidance on solar PV to the National Policy Statement for renewable energy infrastructure. However, there are several provisions which could be strengthened, which we have outlined below.

What are energy national policy statements?

Energy National Policy Statements provide planning guidance for developers of nationally significant energy infrastructure projects. The energy National Policy Statements cover: The guidance makes it easier for decision makers, applicants and the wider public to understand: The 2023 revised NPSs (EN-1 to EN-5) came into force on 17 January 2024.

When did the national policy statements on energy infrastructure come out?

4 National Policy Statements for Energy infrastructure, published June 2011. The then Energy and Climate Change Committee conducted an inquiry into the six energy NPS approved in 2011. The Committee published its report The revised draft National Policy Statements on energy on 18 January 2011. HC 648

What is the National Policy Statement (NPS)?

1.1.5 This National Policy Statement (NPS), taken together with the Overarching National Policy Statement for Energy (EN-1), provides the primary policy for decisions by the Secretary of State on applications they receive for nationally significant renewable energy infrastructure defined at Section 1.6 of this NPS.

What is a national policy statement?

Reasons for the policy are set out in the statement and must include an explanation of how government policy relating to the mitigation of, and adaptation to, climate change, is taken into account. 1 2. The National Policy Statement (NPS) for Energy sets out the Government's policy for the delivery of energy infrastructure.

When did the national policy statements on energy come out?

The then Energy and Climate Change Committee conducted an inquiry into the six energy NPS approved in 2011. The Committee published its report The revised draft National Policy Statements on energy on 18 January 2011. HC 648 5 Energy White Paper, Powering our net zero future, published 14 December 2020

specific to biomass and EfW, offshore wind energy, pumped hydro storage, solar PV and tidal stream energy, or where, although the impact or issue is generic and covered in EN-1, there ...

Energy storage is key to secure constant renewable energy supply to power systems - even when the sun does not shine, and the wind does not blow. Energy storage provides a solution to achieve flexibility, enhance ...

specific to biomass and EfW, offshore wind energy, pumped hydro storage, solar PV and tidal stream energy or where, although the impact or issue is generic and covered in EN-1, there ...

Source: National Institute of Wind Energy. WSH systems gained traction in India following the announcement of the National Wind-Solar Hybrid Policy 2018. To be deemed a hybrid project, ...

Sometimes two is better than one. Coupling solar energy and storage technologies is one such case. The reason: Solar energy is not always produced at the time energy is needed most. Peak power usage often occurs on ...

Australia's Solar Growth According to the Clean Energy Council's bi-annual Rooftop Solar and Storage Report for the first half of 2024, Australia has achieved a cumulative rooftop solar capacity of around 24.4 ...
