Renewable energy represents an optimal option for Syrian citizens under the country"s electricity crisis and the regime"s inability to solve the problem. However, the costs of clean energy are unaffordable to many low-income citizens who are going through a deepening economic and living crisis in regime areas.

Committed to transforming the electricity landscape and increasing the adoption of renewable energy in Syria, the government is aiming to have 10% of electricity generated from solar power by 2030. The Syrian Ministry of Electricity is currently managing the construction of a 100kW solar power plant in the town of Sargaya, which is scheduled to ...
