developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

"The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so. The revised NDC set binding targets of reducing greenhouse gas emissions by 32 percent below 2010 levels in or before 2025 and by 45 percent before 2030.

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way.

As the primary government agency responsible for Energy policies and regulations in the Republic of the Marshall Islands, the Office promotes and assists the development of the Energy Sector in a sustainable and productive manner by promoting the usage of alternative and sustainable energy resources, which produces electricity using Solar ...
