

New Caledonia define bess

What makes New Caledonia unique?

New Caledonia has many unique taxa, especially birds and plants. It has the richest diversity in the world per square kilometre. The biodiversity is caused by Grande Terre's central mountain range, which has created a variety of niches, landforms and micro-climates where endemic species thrive.

How did New Caledonia get its name?

local short form: Nouvelle-Calédonie etymology: British explorer Captain James COOK discovered and named New Caledonia in 1774; he used the appellation because the northeast of the island reminded him of Scotland (Caledonia is the Latin designation for Scotland)

When did New Caledonia get special status?

Under the Nouméa Accord, signed in 1998 following a period of secessionist unrest in the 1980s and approved in a referendum, New Caledonia was granted special status.

Why is New Caledonia a French country?

New Caledonia is a territory sui generis to which France has gradually transferred certain powers. As such its citizens have French nationality and vote for the president of France. They have the right to vote in elections to the European Parliament.

Are there any uninhabited islands in New Caledonia?

New Caledonia also includes a number of far-flung uninhabited islets: Huon and Surprise islands in the D'Entrecasteaux Reefs, the atolls of the Chesterfield Islands and the Bellona Reefs, Walpole Island, Beaufort, Atoll, and Astrolabe Reefs. France also claims Hunter and Matthew islands, but the claim is disputed by Vanuatu.

What did New Caledonia do for a living?

New Caledonia's primary experience with blackbirding revolved around a trade from the New Hebrides (now Vanuatu) to the Grand Terre for labour in plantation agriculture, mines, as well as guards over convicts and in some public works. In the early years of the trade, coercion was used to lure Melanesian islanders onto ships.
