

# Norfolk Island bright energy storage technologies

The U.S. Department of Energy (DOE) today announced \$264 million in funding for 29 projects to develop solutions for the scientific challenges underlying DOE's Energy Earthshots(TM) Initiative to advance clean energy technologies within the decade.

Eolian, BrightNight and esVolta, three US-headquartered developers and independent power producers (IPPs) with energy storage projects in their portfolios and pipelines, have each announced major financing. Eolian raises US\$515 million from six banks

In late 2021, Incite Energy were appointed to review the operations and systems within the Norfolk Island Regional Council (NIRC) electricity business unit (NI Electricity) and implement changes to transition the island to an electricity grid dominated by renewable energy, allowing electricity tariffs to be reduced.

Norfolk Island, the former penal colony and now tourist destination located nearly 1,500km off the east coast of Australia, is calling for proposals for energy storage to maximise its use of solar PV, minimise a growing "solar debt," and cut its crippling electricity costs.

Renewables developer Island Green Power (IGP) has unveiled plans for a utility-scale solar and battery energy storage system (BESS) development in Norfolk, UK. With a potential generation capacity of up to 500MW, East Pye Solar will be located near Long Stratton in south Norfolk.
