

Sincro.Grid has passed another milestone with the start of the trial operation of two battery storage units with 10 MW in total power and a storage time of five hours. Slovenian ...

About a year after unveiling what is thought to be the first large-scale Tesla Powerpack battery project in the Balkans, Slovenian energy services company NGEN has confirmed that it has completed its second, ...

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started their trial period this month, the company launching them announced.

NGEN, a developer based in Slovenia, has celebrated the installation of a 22MWh grid-scale battery energy storage system (ESS) supplied by Tesla in what is thought to be the product's first deployment in the Balkans.

Slovenia-based energy system solutions firm NGEN has deployed the 12.6MW/22MWh Tesla Powerpack system at a cost of \$16.5 million in the first of many projects by NGEN aiming at providing automated grid-balancing services for customers.

The strategy of NGEN is to deploy both large-scale and small-scale energy storage projects and aggregate them into virtual power plants (VPP), combining their respective capabilities to provide a maximum array of services to the grid. It has its own home energy storage solution, NGEN Star, as well as its own smart meters.

Sincro.Grid has passed another milestone with the start of the trial operation of two battery storage units with 10 MW in total power and a storage time of five hours. Slovenian and Croatian TSOs and DSOs are implementing Europe's first ...

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started ...

Within this project, two (x2) batteries of 5MW/25MWh (total of 50MWh) will be installed at two different locations of the grid to enhance adaptation of the electricity system to modern challenges in operation.

Sincro.Grid has passed another milestone with the start of the trial operation of two battery storage units with 10 MW in total power and a storage time of five hours. Slovenian and Croatian TSOs and DSOs are ...

A few grid-scale battery storage projects are already underway in Slovenia, including two units totalling 60MW co-located with a run-of-river hydroelectric plant, as well as a new pumped hydro energy storage (PHES) system from utility DEM.

## On grid battery backup Slovenia

About a year after unveiling what is thought to be the first large-scale Tesla Powerpack battery project in the Balkans, Slovenian energy services company NGEN has confirmed that it has completed its second, even bigger project.
