Cambodia's domestic energy supply in 2021 was 9,255 GWh, with 44% hydro, 41% coal, 8% fuel oil, and 6% solar. [5] Many rural communities are making use of solar power to access electricity. Cambodia had 305 MW of solar installed at the end of 2021, with seven grid-connected projects. Another 700 MW was planned or under construction.
