

Peregrine energy storage Guam

Our team of qualified experts with an established track record executing over 50 GWs of renewable energy and energy storage facilities across the North American energy markets, is focused on developing emission free assets in ...

The deal was awarded by the Guam Power Authority last week, while KEPCO was selected as the preferred bidder for the project in February. The solar park, to be equipped with an energy storage system of 420 MWh, is expected to start selling power by December 2019.

Peregrine Energy Solutions will be in Harper to provide the public with information regarding their proposed lithium battery storage facility on Tivydale Rd. The Harper Community Chamber of Commerce is sponsoring the event to bring awareness of the project to our community.

October 17, 2019: A 300MWh "solar-after-sunset" project to be built on the US island territory of Guam will be the largest in the world says energy provider Engie, which has successfully bid ...

ENGIE has pulled out of a large-scale solar-plus-storage project contract in the Western Pacific US island territory of Guam. The French multinational energy group had in 2019 won contracts to deliver 50MWp of solar PV with 300MWh of battery storage in a renewable energy tender hosted by state electric utility Guam Power Authority.

As states increase their Renewable Portfolio Standards (RPS"s) and make more aggressive targets for renewable development, opportunities for storage will grow in unison. Already, we see products offering both co-located solar and stand alone systems, with financial incentives for development in areas with high renewable targets.
