Attach the Fixing Bracket to the Solar Panel3. Attach the Fixing Bracket to the Solar Panel's Mounting Hole 4. Attach the Other Leg of the Fixing Bracket 5. Attach the Adjustable Bracket to the Fixing Bracket 6. Connect Multiple Panels (Optional) If you've decided to reduce your reliance on the grid and switch to solar, congratulations!

What size solar panels can be mounted on a roof?

Suitable for up to 150wSolar Panels (max solar panel width around 700mm),solar panel length not relevant as the brackets can be moved further apart. Can also be used on roofs,sheds,garages or other flat surfaces to tilt solar panels. Also suitable for ground mounting solar panels.

How to install rigid solar panels on a roof?

EcoFlow's rigid solar panels come with a Tilt Mount Bracketfor easy rooftop installation. The components include four fixing brackets,two adjustable brackets,and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How do I choose a solar panel mounting system?

Whether it's a flat commercial rooftop or a pitched residential roof, the material--be it metal, tile, or asphalt--will dictate the appropriate mounting system. Solar Panel Specifications: The size, weight, and configuration of the solar panels must be compatible with the mounting system to ensure a secure installation.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.
