

Graphite crucibles are potentially interesting for the directional solidification processing of photovoltaic silicon, because, contrarily to standard silica crucibles, they can be used many ...

Graphite crucibles are potentially interesting for the directional solidification processing of photovoltaic silicon, because, contrarily to standard silica crucibles, they can be used many times.

could be used several times. Graphite can satisfy this requirement in view of its high mechanical performances at elevated temperatures. Additionally, graphite is a low-cost material and its ...

Huixian City Mishan Graphite Jip Co., Ltd: We're well-known as one of the leading graphite mold, graphite crucible, graphite block, graphite plate, graphite products manufacturers and suppliers in China. Our factory offers high quality products ...
