

Photovoltaic panel warranty

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty.

What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation- typically between .25% and .75% - per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

Do solar panels outlive warranty?

Yet, with solar panels' lifespans of around 25 years, they are likely to outlive the warranty. Manufacturing defects: Defects in manufacturing are typically covered by the manufacturer's warranty rather than solar panel insurance. Policyholders are encouraged to address manufacturing-related issues directly with the manufacturer or installer.

Should I get a warranty on a solar panel system?

A solar panel system is a multi-decade investment that a warranty can help protect. The less solar power your system produces, the more your home may need to draw from the utility company, which eats into your savings.

Are solar panel warranties transferable in a home sale?

In most cases, solar panel warranties are transferable to the new owner in a home sale. However, some warranties are restricted to the original owner, so it is crucial to clarify this point with the manufacturer and installer offering the warranty.

How long does a solar installation warranty last?

Installer performance guarantees can last between 5-10 years and the specifics vary by company. Finally, if you go solar through a marketplace like solar.com, you may also be covered by another layer of warranties. For example, solar.com offers a TriGuard Guarantee. This marketplace warranty includes:
