Who are solar steel?

Solar Steel are manufacturers of steel modular ballasted support systems for commercial PV and Thermal collector project installations. We supply support systems for Landscape and Portrait installations in any configuration. All of our materials are UK only sourced to provide the highest quality systems along with unbeatable 15 year guarantees.

What is the best slate fixing solution for solar PV installations?

In my opinion, the Solar Slate Plate is the best slate fixing solution for solar PV installations on the market. After installing this product I would not consider using any other product currently out there. Couple this in with a very high level of service, there is no reason to go elsewhere.

Are solar slate plates any good?

Really clever design. The Solar Slate Plate is a great product and comes supplied with all of the fixings required. There are a wide variety of sizes to match your existing roof slates. They are very easy to install and do not require cutting existing slates and do not require sealants. Responses to enquiries are very fast and helpful.

What are solar support structures?

Solar support structures are an optimal solution for various applications such as parking garages, solar farms, carports, canopies, charging stations, ground mounts, and roof mounts at Nucor Buildings Group. Our projects range from highly architectural solar canopies to large institutional, commercial and utility scale solar installations.

What are photovoltaic structures?

Photovoltaic structures represent the supports for photovoltaic panels. These photovoltaic panels can be with an aluminum frame with a thickness of between 30 mm and 45 mm, or photovoltaic panels with double glass without frames. Below are our structure systems available for ground-mounted power plants:

Can photovoltaic panels be mounted on a galvanized roof?

Photovoltaic system with panel mounting on the roof of a galvanized structure. Photovoltaic panels are rarely mounted on the roof to allow the entry of sunlight and rain. The structure has no walls and can have openings up to 15 meters without intermediate pillars. This system is designed for agricultural and keeping animals in free outdoor areas.
