

Planet crash landing solar generator

It'll give enough metal to make a landing pad. From there, you can land one rocket and deconstruct it, then land the other. Or just land 1, load up the dupes from the ground, and blast ...

Pick a generator and automate the fuel, tbh. Everything is reasonably effective for the mid-scale. Pink wool farms for a pink generator, your choice of food for a culinary generator, trees for ...

Solar generators are available as both portable generators and backup home generators. Most solar generators are portable, lightweight, and have a built-in handle. The best portable solar generators are used to provide ...

I am a total geek when it comes to space and the Universe, I therefore decided to make this random planet generator. I collected 78 planets; the most well-known exoplanets closest to our solar system and planets within our solar ...

This tool is a procedural generator that I built to simulate the formation of a solar system and the birth of alien factions within it. Everything in this is procedurally generated, one way or another: ...

While solar arrays have traditionally been the most popular choice for spacecraft traveling within the inner solar system, solar intensity decreases according to the inverse ...
