

Does Exide have a solar power plant in Portugal?

Exide now has a combined capacity of 4.5 MWp in Portugal, reducing carbon emissions by more than 20% across two plants. Exide Technologies and energy provider EDP are going live with a state-of-the-art solar installation at Exide's Portuguese battery production facility in Castanheira do Ribatejo.

How much power does Exide have in Portugal?

Exide now has a combined capacity of 4.5 MWp in Portugal, reducing carbon emissions by more than 20% across two installations.

Who is Exide Technologies?

Exide Technologies, headquartered near Paris, France, is a leading provider of advanced energy storage solutions for the automotive and industrial markets.

In two state-of-the-art solar installations, Exide Group is powering its battery production and recycling facilities using advanced lead battery energy storage. With a combined capacity of 4.5 MWp between the two installations, located in ...

Exide Technologies and EDP have gone live with a solar installation at Exide Technologies' battery production facility in Castanheira do Ribatejo, Portugal. It is backed by an energy storage system using Exide Technologies' high-performance Sonnenschein A600 gel battery technology, allowing for greater control and self-consumption of energy.

Exide Technologies has announced two new photovoltaic installations with a total capacity of 3.8 MWp in Portugal. These will be situated at Exide's production facility in Castanheira do Ribatejo and its recycling plant in Azambuja.

In two state-of-the-art solar installations, Exide Group is powering its battery production and recycling facilities using advanced lead battery energy storage. With a combined capacity of ...

Exide Technologies and energy provider EDP are going live with a state-of-the-art solar installation at Exide's Portuguese battery production facility in Castanheira do Ribatejo. It is backed...

Portugal's EDP has inked a deal for its largest PV project to date, a 3.8MWp solar-plus-storage duo it will develop for lead acid battery and storage system maker Exide Technologies. The agreement signed this week will see EDP deploy and run two PV installations powering Exide's industrial units in Castanheira do Ribatejo and Azambuja, some ...

In our production plant, the PV installation is combined with our own battery energy storage system (BESS).

It contains 70 inverters and 290 Sonnenschein Solar battery cells, with an available stored energy of around ...
