

French Guiana, a French overseas territory located on the northeast coast of South America, is characterised by its dense rainforest geography and a sparse population primarily concentrated along the coast.

The plant will therefore generate non-intermittent renewable electricity in the North-West region of French Guiana, which faces an important increase in electricity demand on a geographically constrained territory.

contract with French utility EDF. The construction work will start on September 30 and the commissioning is scheduled for April 2024. The project represents a total investment of 170 ...

HDF Energy, together with infrastructure fund Meridiam and the petroleum operator SARA have started construction of CEOG Renewable Power Plant in French Guiana, on the northeast coast of South America.

NEOSUN PowerHub is the lowest cost source of clean and reliable off-grid power for remote locations. It is a stand-alone, turn-key system that combines solar energy production with integrated energy storage in a readily deployable and easily movable form that's ideal for remote power applications.

contract with French utility EDF. The construction work will start on September 30 and the commissioning is scheduled for April 2024. The project represents a total investment of 170 million euros and is expected to generate a turnover

By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy. Connected to the grid through EDF's power station of Saint-Laurent-du-Maroni, CEOG will meet the current and future needs of the population in the area.
