

Reasons for recommending solar panels

Why do people install solar panels?

Solar panels are often marketed as a way to save money on electricity- and sometimes as a way to make money too. This is because you can get paid for the electricity they produce that you don't use. Of course, many people install solar panels for other reasons.

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

Are solar panels a good investment?

Using electricity generated by your solar panels guarantees that your home is running on renewable power. This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.

Why do people buy solar panels?

Being more environmentally friendly and combatting the high cost of grid electricity were among the biggest reasons people bought solar panels, according to our recent survey. Others were keen to reduce their reliance on grid electricity, or were prompted by local council or government schemes.

Why is solar energy so popular in the UK?

The popularity of solar panels is skyrocketing. More than 1.3 million rooftops in the UK are now decked out with panels - and with solar panel costs decreasing massively over the past decade, it's more accessible than ever. But why could solar energy benefit you? Well, first and foremost, it can cut your monthly electricity bills by around 70%.

Should you add solar panels to your home?

This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.
