This ESM 48100A1 was certified with an upper charging limit of 55 V. The recommended float voltage is
53.5 V. If 70 V work, good for you, but it's not something I'd do if I could avoid it. The 8 unit parallel limit is
if you connect their BMSes with the RS485 interface. If you use the CAN interface you can connect up to 32
in parallel.
