

Reunion, June 29, 2022 - EDF Renewables continues its deployment on the island of Reunion with the start of construction on the ground-mounted solar power plant at RiviÃ©re des Galets, ...

Find solar panel locations in RÃ©union through our RÃ©union solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area. Discover the largest solar farms in RÃ©union and find solar farms near you.

Le Port, October 27, 2023 - EDF Renewables inaugurates the RiviÃ©re des Galets solar power plant in RÃ©union. Located on a former "wild" landfill, it helps to give a second life to this site. It will provide the equivalent of the annual electricity consumption of 4,500 people in renewable energy, or 14% of the population of the commune of ...

Reunion, June 29, 2022 - EDF Renewables continues its deployment on the island of Reunion with the start of construction on the ground-mounted solar power plant at RiviÃ©re des Galets, in the commune of Port. With an installed capacity of approximately 5 MW, this new project contributes to achieving the island's energy autonomy objective.

With high reliable prediction and energy management software, the plant will feed in the Reunion Island grid a no-intermittent renewable energy. This solar power plant is a world first and paves the way for a new era of photovoltaic predictable, stable and available.

EDF Renewables built and operates three solar power plants on the island of Reunion: Saint-Pierre (4 MWp) and Sainte-Rose (10.5 MWp) commissioned in 2009, and now RiviÃ©re des Galets (4.6 MWp), just inaugurated.

Le Port, October 27, 2023 - EDF Renewables inaugurates the RiviÃ©re des Galets solar power plant in RÃ©union. Located on a former "wild" landfill, it helps to give a second life to this site. It ...

With an installed capacity of 9 MW, the Les CÃ©dres solar farm is the second facility with integrated storage (9 MWh) to be commissioned on Reunion Island. This storage helps support the power grid through the stable and continuous injection of energy, thus eliminating weather-related intermittence issues.

Created in 2007 on Reunion Island, the Indian Ocean subsidiary today boasts a wide variety of solar farms. Here, it started the Group's first agrivoltaics plants, as well as the Aquanergie® technology and the first battery storage solutions which have given Akuo sound expertise in Non-Interconnected Zones (NIZ).

Solar thermal collectors and photovoltaic (PV) systems are already widespread in La Reunion. 70% of

RÃ©union solar farm company

households are equipped with solar domestic hot water and PV represented approximately 25% of the total installed capacity of electricity generation in 2022.
