Saint Barthélemy el sun energy

These algae, a veritable scourge when they arrive on the coast, prove to be, at sea, an astonishing source of biodiversity. Jérôme Delafosse and Francine Kreiss decide to dive underneath and discover an atmosphere never seen before: it is almost dark in the middle of the slick while the sun is shining brightly on the surface.

St. Barts' commitment to solar energy is paying off. In 2021, the island generated over 20% of its electricity from solar power. The island is on track to achieve its goal of generating 100% of its ...
