Saint Lucia is boldly playing its part in tackling the global climate crisis by pursuing greener and cleaner energy solutions. From August to December 2023, the government installed more than 14,000 light emitting diode (LED) bulbs around the island. Nearly 17,000 LED bulbs will be installed by the end of March 2024.

"The world is in an uncharted territory. There is but a narrowing window of opportunity to secure a livable planet for all," Pierre told the Dubai, United Arab Emirates event. The Saint Lucia Prime Minister observed that ...

Saint Lucia's energy landscape presents a clear picture of fossil fuel dependence, with the island consuming over 20.7 million imperial gallons of diesel for electricity generation alone in 2022.

On the heels of COP29, Saint Lucia's ambitious climate commitments are again in focus. The island has

Saint Lucia greenlight planet

positioned itself as a regional leader in the fight against climate change, with its 2023-2030 National Energy Policy (NEP) setting an aggressive target of 50% renewable energy by 2030.

The Caribbean Island of St. Lucia is known for its beautiful beaches, lush rainforests, and colorful coral reefs. But for some of the almost 200,000 people that live on the island, another incredible resource is affecting their daily lives -- the nearly 15,000 solar panels that are producing clean, reliable, electricity from the island's ...
