What is Himawari solar lighting system?

LA FORET ENGINEERING CO.,LTD. (Mori Building Group) Copyright (C)2022 LAFORET ENGINEERING CORPORATION. All rights reserved. Himawari solar lighting system brings real natural sunlight indoor by using the convex lens and quartz glass optical fiber cables. Let natural light light up your house to improve the life quality.

How does the Himawari solar lighting system work?

The Himawari solar lighting system works by directly collecting sunlight using a sunlight collector (lens focusing unit) and quartz glass optical fiber devices. It also features an automatic tracking system and is covered by an outer acrylic dome. The natural light from the sunlight is harnessed instead of using electronic energy like regular LED lights.

Can I switch between the Himawari and artificial illumination systems?

We have an automatic dimmer system available which allows you to switch between the Himawari and artificial illumination systems. Sunlight is condensed about 10,000 times through a highly efficient lens.

How much light does a Himawari system emit?

Light is emitted at a spread angle of 58° from the edge of an optical cable. At two-meter from the end of the optical fiber, an approximately 1.5-m diameter circle region is illuminated at approximately 1,036 lux on average (per cable) and one Himawari system is equipped with two cables.

How many Lux does a Himawari system have?

At two-meter from the end of the optical fiber, an approximately 1.5-m diameter circle region is illuminated at approximately 1,036 lux on average (per cable) and one Himawari system is equipped with two cables. We have an automatic dimmer system available which allows you to switch between the Himawari and artificial illumination systems.

Especially, global energy consumption hit a record high recently. Therefore, how to save your electric bill and reduce energy consumption in the meantime you still can keep the stylish home's ambiance is just what Himawari can do for you. Himawari provides natural solar light indoors, reducing artificial lighting requirements and saving energy.

Himawari solar lighting system provides the real sunlight following the natural sunlight change over time during each day. The circadian rhythm light can help us to control our body's circadian system. Himawari Solar Lighting System Laforet Engineering Co. JP Tel: +81-03-6406-6256

South Pacific Island efforts to reduce dependence on costly and polluting diesel fuel continue, with the installation of 546kW of solar PV across the islands of Samoa - the independent ...

Compared to regular LED light which is specific radiations triggered from electronic energy, the natural light of Himawari is direct from real sunlight. The HIMAWARI system consists of a sunlight collector (lens focusing unit), quartz glass optical fiber devices, an automatic tracking system, and the outer acrylic dome covering all the devices.

Samoa has completed the installation of its largest solar project yet - a 546kW PV system that spans three separate sites on two of the independent state's South Pacific islands, Savai'I and ...

Compared to regular LED light which is specific radiations triggered from electronic energy, the natural light of Himawari is direct from real sunlight. The HIMAWARI system consists of a sunlight collector (lens focusing unit), quartz ...

El sistema Himawari<sup>®</sup> consta de una unidad de lentes que enfocan la luz solar en unos terminales de cables de fibra óptica. La fibra óptica transporta esa luz, de la forma más eficaz, hasta el punto donde se necesite (hasta 150 m de distancia). Está dotado de un sistema de seguimiento automático para detectar con precisión la posición del sol y obtener el máximo ...

Himawari provides the natural sunlight with the full spectrum which is similar to the real sunlight for your scientific experiments and reserches. Himawari solar natural lighting system. How it works; ... Himawari Solar Lighting System ...

The running cost of the HIMAWARI system is approximately 1 yen a day when equipped with a twelve-lens collector. By using an energy-saving type system that is powered by solar cells, you can reduce the electricity cost to zero yen. <sup>183</sup> Once the HIMAWARI system is installed, it operates automatically without any need for manual operation.

The Solar for Samoa PV project is situated over two locations; Faleata Racecourse (1.4MW AC) is located in the capital city of Apia, while Faeolo International Airport (2.1MW AC) is located approximately 40 kilometres west of Apia.
