

The Independent State of Samoa, a small island nation in the Pacific, is going solar to help make sure it's roughly 200,000 citizens have access to cheaper power. That's thanks to a 546 kilowatt project being developed by SunWize Technologies, and financed by Japan's Pacific Environment Community (PEC) Fund.

The 3.5MW AC project is powered by approximately 47,000 First Solar advanced thin film PV modules and supplies power to the Electric Power Corporation. The plant is helping Electric Power Corporation achieve its renewable energy targets, and the electricity produced by the solar farm offsets a portion of existing diesel-generated

The solar panels that you see covering its roof today has taken three years to reach this stage. BAT Samoa has made a substantial investment of over half a million tala in this project. We must commend BAT Samoa for taking this bold step and making a strong commitment to the environment and also to Samoa's Climate Change agenda.

Samoa's 400kWp Solar Project This report was prepared by Julia McDonald, Joe Wookyeung and Phillippe McCracken. In recent years there has been increasingly compelling evidence that anthropogenic climate change not only threatens the biophysical environment but it also increases potential vulnerabilities of the people and the socio-economic ...

The installation of Samoa's 546kWp solar PV grid-connected system is expected to provide significant benefits to the government of Samoa by reducing the use of diesel by around 190,000 litres p.a and realizing costs savings of approximately SAT570,000 per annum in a country which generates 60% of its electricity from diesel.

Find solar panel locations in Samoa through our Samoa solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area. Discover the largest solar farms in Samoa and find solar farms near you.

6 ???· MANILA, PHILIPPINES (10 December 2024) -- The Asian Development Bank (ADB) has signed a transaction advisory services agreement with Samoa's Electric Power Corporation (EPC) to support the development of a solar photovoltaic and battery energy storage systems with installations planned for the country's two largest islands, Upolu and Savai'i.

Samoa 4.5MW Utility scale grid-connect solar power plant In 2014, Harelec secured a contract to supply power to the Samaon Electric Power Corporation, through the construction of a 2.6MW solar power plant to be constructed near the Faleolo ...

Samoa patriot solar panels

South Pacific Island efforts to reduce dependence on costly and polluting diesel fuel continue, with the installation of 546kW of solar PV across the islands of Samoa - the independent state's largest solar project yet.

4 ???· The project is expected to represent a capacity of up to 40 megawatts of solar and 40 megawatt-hours of batteries. According to the ADB, this will be a cornerstone of Samoa's efforts to achieve 70 per cent renewable energy in its electricity mix by 2031.
