

Sardinia is far larger than other tourist destinations like the Greek and Balearic Islands (which is a clear advantage in terms of building wind farms and solar power plants), and could provide...

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ambition to become net-zero by 2030 at the UN Climate Ambition Summit in December 2020.

Providing Maldives resorts a full solar power solution, Atoll Solar ensures you reap the maximum return from your solar energy investment. From installation to maintenance, our trained and certified team is committed to make solar power a seamless process for your property.

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ...

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate color for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

It has already given way to infrastructure projects like a sprawling three-kilometer solar facility which greets visitors as they touch down near Malé, Maldives' capital city. It is the largest solar farm in the country, generating five megawatts (MW) of clean energy and helping expand a market once considered unrealistic in a small island ...

Fenaka, in partnership with the Ministry of Climate Change, Environment and Energy, has officially launched the Magey Solar program, an ambitious initiative aimed at harnessing solar energy by installing photovoltaic (PV) systems on the rooftops of private homes across the Maldives.
